Family, 2003
black and white photographs
24 x 18 inches

In this project I express my feelings towards Family and the importance of it to me. I show this by using photographs of my family members. I express the value and importance that each person should have for their family. I chose these prints because they illustrate my meaning of the word family. I used the eyes to show that even if we're far from our loved ones we should have a clear presence of them in our mind.
